Fatulla, Narayangang

Top Management

From the desk of the Chairman

Since 1993, Unicom Textile Mills Ltd has been a frontline contributor in the march forward of the export oriented clothing industry of Bangladesh.

Pioneer in manufacturing Poly-cotton blend fabrics, it has been manufacturing and supplying woven fabrics to the export-oriented garment factories. As a sensible corporate citizen, Unicom emphasizes first the issues of people, environment and principles of ethics in manufacturing.

Led by competent entrepreneurs, managers, professionals, experts and staff, Unicom is committed to packing its buyers' every single penny with value and satisfaction.

Chairman

From the desk of the Managing Director

It is more than thirty years by now, Unicom Textile Mills Ltd has been manufacturing and exporting woven fabrics with repute.

It manufactures and supplies fabrics to the export-oriented garment factories. Besides, it is a licensee fabric manufacturer for the globally reputed buyers as well. Ever since, we have been relying on state of the art European technology as well as extensive research and development in areas covering weaving, dyeing, printing, finishing and the likes to rationalize the economy of scale and synergy in operations which is meant for the ultimate benefits to our clients.

Our work environment, exhaust heat recovery system, ETP and CRP are just a few of our commitment commitments an environment friendliness.

Thanks to our valued clients, we always look forward to serving them sincerely with warmth and service wherein quality, economy and delivery are nothing but the obvious integral parts of our Unicom culture.

Managing Director

Production Facilities

Unicom's production base is ideally vertical to be self-reliant, subsequent to importing yarns and Greige fabrics from assorted suppliers from Indonesia, Thailand and India.

Yarn Dyeing

It's yarn dyeing production capacity amounts to 170 tons of world standard dyed cotton and blends of yarns per month. It is equipped with SSM hard and soft coning machines, STALM dryers and the likes.

Weaving

In weaving, Unicom is equipped with hi-tech machinery. It has sizing machine from the world best technology provider Karl Mayer, Germany. Unicom has got the 72 latest Toyota JAT810 and Tsudakoma ZAX9200i air jet looms.

It produces, on average 700,000-800,000 yards of prime quality cotton and blended woven greige and yarn dyed fabrics per month.

Product development in weaving is added by TONYUA-desk looms, Sectional warping and single end sizing. For SMS/Proto sampling, Auto SGA598-16 sample machine is used.

Grey Inspection

Greige fabrics inspection strictly conforms to four-point checking system, yard by yard, for all it's in housed weaved as well as imported greige.

Back Process

Heading for dyeing and Printing, however, at the entry point, all the griegie fabrics must have to pass sample tastes for each lots and batches invariably. The greige fabrics pass through Singeing & Desizing, Scouring, & Bleaching and Mercerizing Machine.

Back Process of fabrics is done for making the fabrics ready for dye and print through the state-of-the-art machines such as Singeing and Desizing from Osthoff, Germany, Continuous Scouring and Bleaching as well as Mercerizing from Benninger of Switzerland.

Fabric Dyeing, Printing and Finishing

Unicom is self-sufficient to dye all the griego fabrics it produces and imports. Unicom has Continuous dyeing range from Monforts Germany and Pad Steam Wash from Benninger, Switzerland. It has also Cold Pad batch dyeing from Benninger, Switzerland. It has got All Over Rotary Printing Machine from Zimmer of Austria & SPG printing machine while Laser Engraving machine from Switzerland. Unicom can produce around 1 Mil yds dyed fab and 1 Mil yds AOP fabrics per month.

In Finishing Unicom has Monforts – Monfongs Stenter machines, Danti Paolo peach machines, Danti Paolo Raising/Brushing machines and AIRO 24 special finishing machines which are of world champion brands from Europe.

All Unicom’s machines have been installed during 2016-2024. Altogether Unicom’s dyeing, printing and finishing capacity at present stands on 2.5 million yds per month.

Digital Printing

Eight headed Digital Textile Printing Machines have been installed with production capacity up to 150,000 yds per month. It does reactive printing on 100% cotton & silk fabrics.

Laboratory

To ensure the height of dyeing standards, it maintains a state-of-the-art laboratory, which applies world class test protocols-calibrated most sophisticatedly. Pilot Lab for solid dyeing and all other testing facilities are the hottest in the world . All here are meant to ensure perfection in fabric dyeing. Unicom's lab is accredited by H&M.

Power Plant: To ensure uninterrupted power round the clock to all of the operations here, Unicom has a 5.78 Mega watt power generation system which is able to support its entire power demand.

CRP: Its Caustic Recovery Plant which recovers about 70% of the caustic soda used in mercerizing of fabrics. Plant's capacity is 4.5 tons per day. This recovered soda is reused in the process again and again, continually.

WTP: All the water that Unicom consumes is pumped through its own deep tube wells, and is appropriately treated through a water softening plant having the capacity of 75 cubic meters per hour.

Pond: All the water that Unicom consumes is pumped through its own deep tube wells, and is appropriately treated through a water softening plant having the capacity of 75 cubic meters per hour.

ETP: All the water that Unicom consumes is pumped through its own deep tube wells, and is appropriately treated through a water softening plant having the capacity of 75 cubic meters per hour.

Warehouse

Finished fabrics are stored conforming to the best protocols of contemporary industrial science.

Products

Fabrics that Unicom produces include 100% Cotton, Cotton Spandex, Poly Cotton Spandex, Poly Cotton Blend like, TC, CVC with different types of weave with different construction and composition for both tops and bottom wears ranging GSM 70-350 and yarn count 7-80's of Solid, Print and Yarn Dyed fabrics.

Buyers

It manufactures and exports high-quality woven fabrics to the export-oriented garment factories on demand. It is a licensee fabric manufacturer for the globally reputed buyers such as H&M, C&A, LPP, M&S, Perry Ellis, Primark, LC Waikiki, Express, ULAC, Ven Heusen, Centric Brands, Tommy Hilfiger, Calvin Klein, Costco, O'STIN, ZXY, Falabella, Tottus, Aldi, Stoker, Celio, Max (Dubai), Billabong, GAP, Lucky Brand, Quick Silver, GU, Uniqlo, Gemo Etc.

And importer like David Howard, Prominent, Guldenpfennig and Aditya Birla import from Unicom.

Certificates & Awards

It can be mentioned that, Unicom is successfully certified and awarded with Oeko Tex Class -I, GOTS, GRS, H&M (Gold) along with several other globally recognized quality, environment and management standards.

HR, Compliance

Nearly 1000 people are working here in most pleasant environment. As a world standard work place, Unicom is fully compliant abiding by the local and international conventions and provisions required and applauded.

It provides personal health and hygiene measures, on time wages and other financial benefits, appropriate medical care, befitting maternity attention and benefits, safe and homely child care services, and some other incentive, bonus, grants and recreational opportunities - many of which are not even mandatory in the given law of the country.

Firefighting preparation gets an extra emphasis here. It exercises firefighting and evacuation drill on a regular schedule.
